Product description

Technical data

The built-in socket EVOline One is a compact power access point that can be harmoniously integrated into any design concept. And this on a very space-saving and discreet way. Whether in completely black design or with stainless steel inlay: Both versions can be easily exchanged thanks to the easily replaceable module inserts of the respective adjust requirement. The new, patented mounting system holds from a front thickness of 9 mm. The installation depth is 50 mm.

USB-A Charger 2-fold is only suitable for power supply. The charging function of the USB charger cannot be guaranteed in every case due to the large number of providers and devices.

Supply voltage

230 V

Rated current maximum

10 A

Dimensions

Ø 59 mm

Dimensions Thickness

4mm

Installation depth

50mm

Orifice Bore
