Product description

Technical data

The built-in socket EVOline One is a compact power access point that can be harmoniously integrated into any design concept. And this on a very space-saving and discreet way. Whether in completely black design or with stainless steel inlay: Both versions can be easily exchanged thanks to the easily replaceable module inserts of the respective adjust requirement. The new, patented mounting system holds from a front thickness of 9 mm. The installation depth is 50 mm.

Supply voltage

230 V

Rated current maximum

16 A
